# THE TRUTH IS!

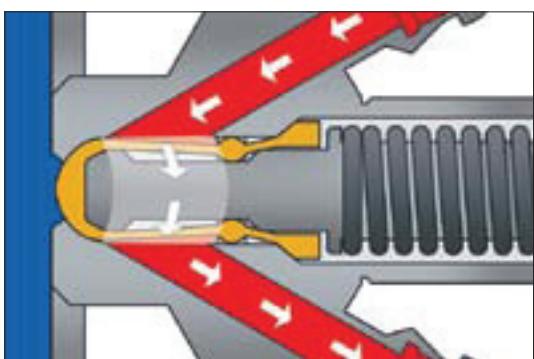

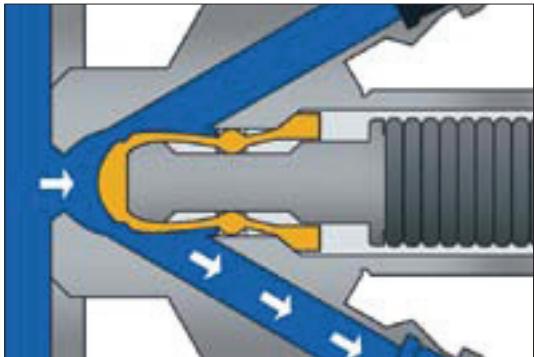

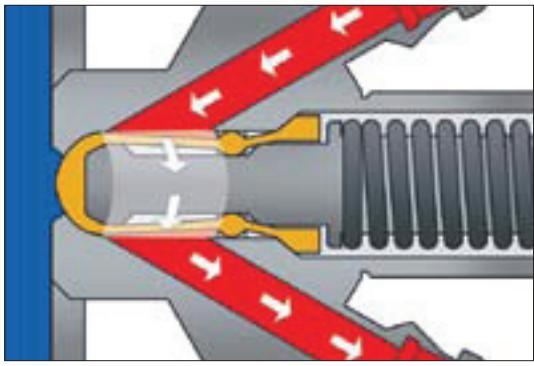

## USE KEOFITT® SAMPLERS OR:

- JEOPARDIZE PRODUCT
- COMPROMISE QUALITY CONTROL

The whole secret behind Keofitt®'s good performance as a sampling valve is that from the outset, we eliminated places that could not be cleaned. The Keofitt® valve has no dead space, so it gives you a completely clean, representative sample – every time!

## STEAM – SAMPLE – STEAM

The real advantage of any Keofitt® valve is its hygienically designed interior. The design means the Keofitt® valve can be easily cleaned and sterilised using steam – and we have the proof!

THE FAMILIAR  
REVOLUTION

THE NEW  
TRUTH

# TOO MANY PRODUCTION MANAGERS LIVE WITH A FALSE SENSE OF SECURITY

## ARE YOU SURE?

Unless your sample goes through a Keofitt® valve, there is a chance that it may be contaminated or, even worse: the very process of taking samples could contaminate your production. Are you absolutely sure of the quality of your day-to-day samples?

Keofitt®'s extensive insight into many different production lines and sampling covering such varied fields as food production, pharmaceutical production, brewing and the manufacture of beverages means our valve not only delivers what it has to deliver – invisibility; close contact with the market also means we can keep on developing the best valve for the latest requirements.

The basic principles of cleanliness, accessibility and conscientiousness which have created Keofitt®'s excellent reputation around the world carry through into the latest developments in Keofitt® valves. But the best thing about Keofitt® is still what it does NOT give you - risk of contamination.

"Actually, the best thing about the Keofitt® valve is that you don't give it a second thought. You go down and take the sample, and then you leave again. The valve is sealed, and it's leak-proof. Never gave it a second thought, did you? You've got your sample, and you carry on with your job."
